

Poynt Apps Marketplace

The Poynt Apps Marketplace optimizes benefits for all ecosystem participants thanks to a completely innovative approach to developing long term value for merchants, developers and acquirers.

MERCHANTS

Customize your Poynt terminal with apps designed to let you create a more efficient business operation. Best of all, you can test all of our apps for 30 days, free of charge.

ACQUIRERS & ISOs

Sell a product that merchants actually want on their countertops. Apps deliver value beyond payments, as such, you are able to sell a higher margin terminal.

DEVELOPERS

You have the potential to get exposure to hundreds of thousands of merchants and some of the top reseller organizations across the US ensuring downloads and revenues.

About the Poynt Apps Marketplace

The Poynt Apps Marketplace contains the essential apps merchants need to optimize their business operations like order ahead, time clock management, upgraded POS, cash & tip reporting, POS integration, and an end-to-end gift card program.

Our focus is to provide merchants with a curated apps experience, featuring apps we have road-tested and that we believe provide the highest utility to our resellers and end-users; look out for additional apps in the future as we continue to grow the ecosystem.

Featured Apps

Merchants will receive app suggestions on their terminal and on Poynt HQ that are best suited to their business. In the meantime, please enjoy a sample of our curated apps below.

Time Clock Management Homebase

Employees can clock in and out of their shifts; merchants can manage employee schedules and timecards all on the Poynt Smart Terminal.

Point of Sale System Lightning Register

Lightning Register is a powerful, but easy-to-use POS app, with advanced sales reporting and the ability to keep your accounting in sync with QuickBooks.

Gift Card Program Net Element

Incentivize and reward your customers with a great loyalty program; manage multiple offers, customer surveys, and loyalty across multiple stores and terminals.

Pay at Table Integration Pay at Table SMB

Integrate your Poynt Smart Terminal with your restaurant POS to offer a seamless pay-at-table experience with EMV compliance.

PreOrder via Facebook OrderMax

Your customers can message your business's Facebook page to pre-order – a friendly chatbot responds, processes the order, and sends it to your Poynt Smart Terminal.

Have questions? Merchants and resellers, contact support@poynt.com to get started with Poynt Apps. Developers, visit poynt.com/developers to start building your next amazing app on Poynt.
